No. Inclosures: - Prepared by: Henry Nelson
Source of Information: General Gottlob BERGER
Distribution: 5 Copies Hq. C.I.U., District No. 1
1 Copy Team No. 11 File

1. On 2d and 29 November 1949, General Gottlob B. Beck was reinterviewed at the Prison in L. J. M. (L. J. M. 10554), in compliance with specific request No. 828, dated 9 November 1949.

2. The following additional information in reference to ... 24 of ... 11-13-49 was obtained from HSCG:

a. The German V-weapon research and development was a direct result of various agencies and individuals, for instance the Air Force, the Army, several universities and Professor von SIEGHEIM (SAIGER-1347), were all engaged in certain phases of the V-weapon project. All those agencies kept the strictest secrecy in regard to their own results. However on or about the 2 September 1944, HITLER issued a special order, granting Doctor KAMMER the permission to have access to the existing plans and developments of every agency and to employ all specialists KAMMER wanted to utilize for one combined V-weapon project. After surveying all the different V-weapon, KAMMER selected plans and specialists and created an entire new staff in the DORA underground factory in the SAUERHAUSEN (SLOAN-1177) district. The outcome of these combined efforts was the V-7 missile, supposedly a combination of all existing German V-weapon. According to KAMMER's knowledge, two (2) missiles of the V-7 type were completed. In March 1945 KAMMER wanted to fire the two missiles against Paris. The bridge crossing the AUTOUAREN Moselle-Saarlautz was demolished, to be able to transport the missiles to the launching site. Nevertheless HITLER did not give the permission for this venture. KAMMER stated further that according to information he received from various V-weapon experts, the missiles carried the designation A 1 to 15 and other numbers f.i. X-7, X-4 as long as the weapons were in the designing or development stage.

PIR No. 11-157-1249, OSI, Team No. 11, JPO 633, USAF, Subj: Interrogation of
BREGEN, Gottlob, General of the Waffen SS, dtd 5 Dec. 49, Cont'd.

When the missile could be applied for tactical military use, the designation was
changed into V-Wer (Vergeltungs - Revenge Weapon). BREGEN was unable to give
additional information on this subject.

b. With reference to paragraph 2 b, PIR 11-62-0749 and paragraph 2 b,
PIR 11-129-0949, BREGEN made the following correction: Instead 300,000 Volt it
should read 300,000 KILOWATT transmission lines.

APPROVED:

WILLIAM V. RUSSELL, JR.
Agent in Charge
